MADE IN CANADA

#2

- The connection can be done by using a coupling.
The Inline Filter Box ships with 1× coupling and 1× 3" clamp.
- The connection can also be done by using flexible or solid ducts.
The product ships with 2× flexible ducts.

#1

- Check for the sticker on the Inline Filter Box.
- **IN** draws air from the outdoors.
- **OUT** connects to the supply port of a product.

#3

- Mount the Inline Filter Box (IFB) on a sturdy surface.
- The base of the IFB can be affixed with double-sided tapes.
- The base of the IFB can also accept four M4 × 0.7 pitch × 8mm long self-tapping screws for fastening to wall brackets.

Note. It is strongly recommended to install the Inline Filter Box in an indoor space.
